

Intercontinental Terminals Company (ITC) Fire

AIR MONITORING:

EPA conducted handheld air monitoring from March 20, 2019 (12:00 pm) to March 21, 2019 (4:00 am) at 63 locations. Results were reported above the detection limit at one location for total volatile organic compounds (VOCs) and benzene (0.9 ppm). Benzene was detected at this location above the TCEQ AMVC for benzene (0.18 ppm). This air monitoring location is adjacent to the ITC facility. These instantaneous detections were shared with TCEQ to determine if there is a short-term health concern.
